

# Stories from Unity

Aras Pranckevičius  
<http://aras-p.info>

# /me

- Unity Technologies
  - ne įkūrėjas!
- Teorija: Lead Graphics Programmer
- Praktika: troublemaker

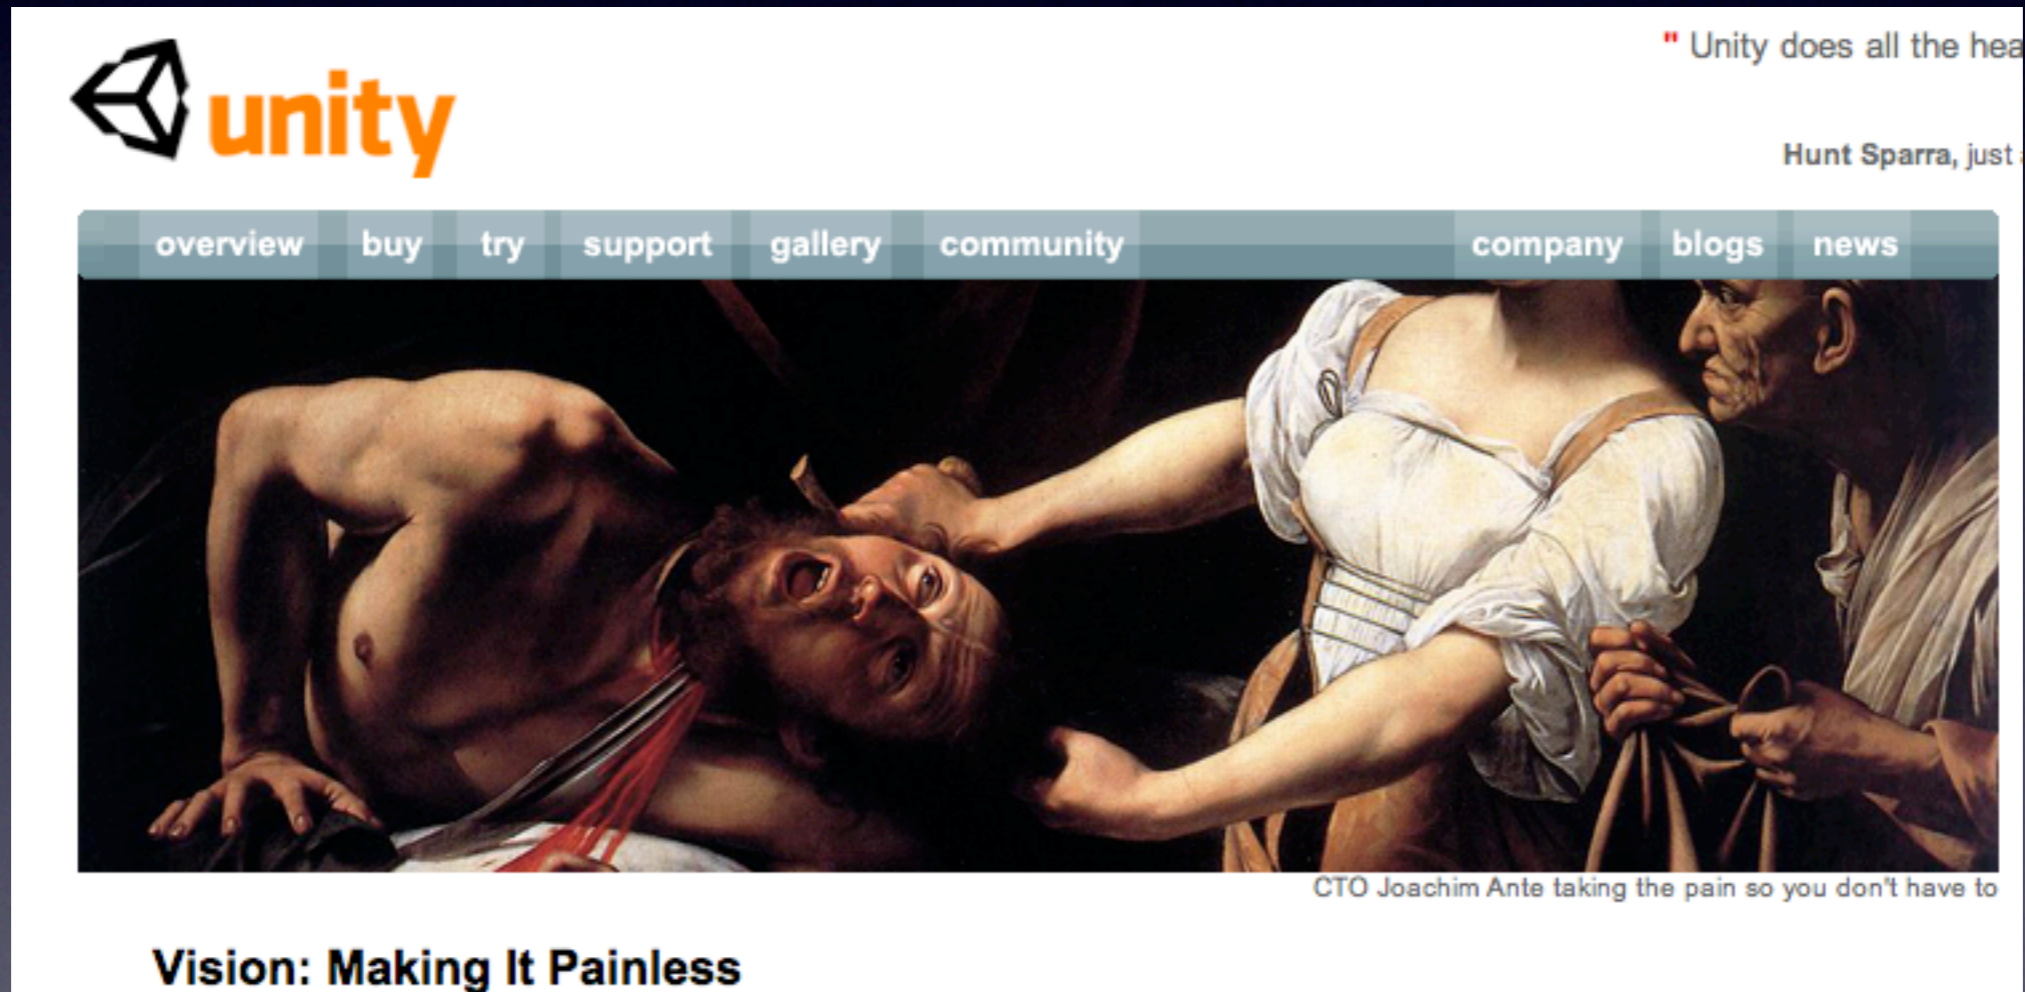

# Unity Technologies

- Taking the pain out of game development
- Produktas: Unity
  - Ne Web 2.0!
  - ~500 KLOC, daugiausia C++

# Unity Technologies

- Real actual website, ~2007

# Unity

- Žaidimų kūrimo įrankis
- Maždaug “3D Flash”
- Windows, OS X, browser, iPhone, Wii
  - Daugiau “in the works”
- Maži/vidutinio dydžio žaidimai

# Unity

## Integrated Editor

Everything is done through Unity's simple user interface. Thousands of hours of thought and spit-polish have gone into it. [Read more](#)

## Graphical Power

Unity has a highly optimized graphics pipeline for both DirectX and OpenGL. [Read more](#)

## Asset Importing

All major file formats are supported, and almost any art application can be used with Unity. [Read more](#)

## One-Click Deployment

Unity supports a wide range of platforms when you release your work to the come alive. [Read more](#)

## Wii Publishing

The industry's most popular console just got a lot easier to develop for... [Read more](#)

## iPhone Publishing

Revolutionary game development comes to a revolutionary device. [Read more](#)

## Shaders

Unity's shader system combines ease of use, flexibility and performance. [Read more](#)

## Terrains

Vast, densely foliated landscapes that run smoothly on low-end hardware. [Read more](#)

## Networking

Go from single-player to full realtime multiplayer games. [Read more](#)

## Physics

Bring your interactions to life with the built-in Ageia PhysX™ physics engine. [Read more](#)

## Audio & Video

Mix realtime 3D graphics with streamed audio and video. [Read more](#)

## Scripting

Blazing fast .NET-based JavaScript and C#, with rich libraries and great documentation. [Read more](#)

## Unity Asset Server

The Unity Asset Server is an add-on product which adds version control to Unity. [Read more](#)

## Shadow & Light

Realtime soft-shadows and baked lightmaps, spiced up with halos and lens flares. [Read more](#)

## Documentation

We provide you with step by step tutorials, documentation and example projects. [Read more](#)

# 2005

- Startup!

# 2009

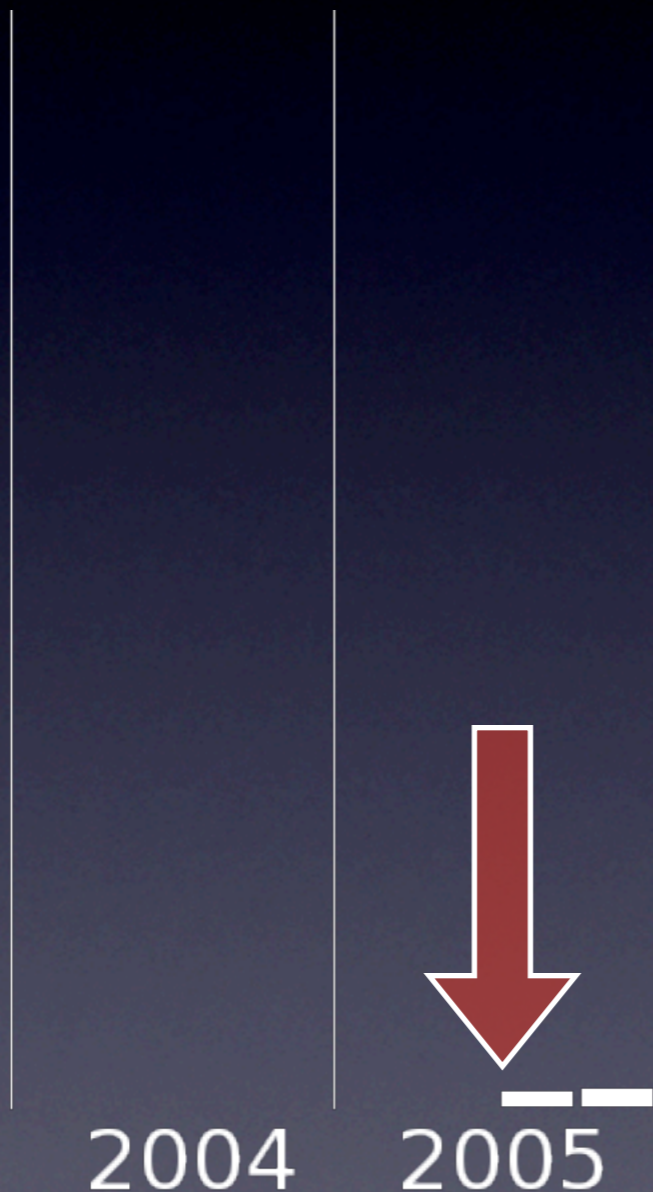

- Startup? Turbūt nelabai

# Pradžia

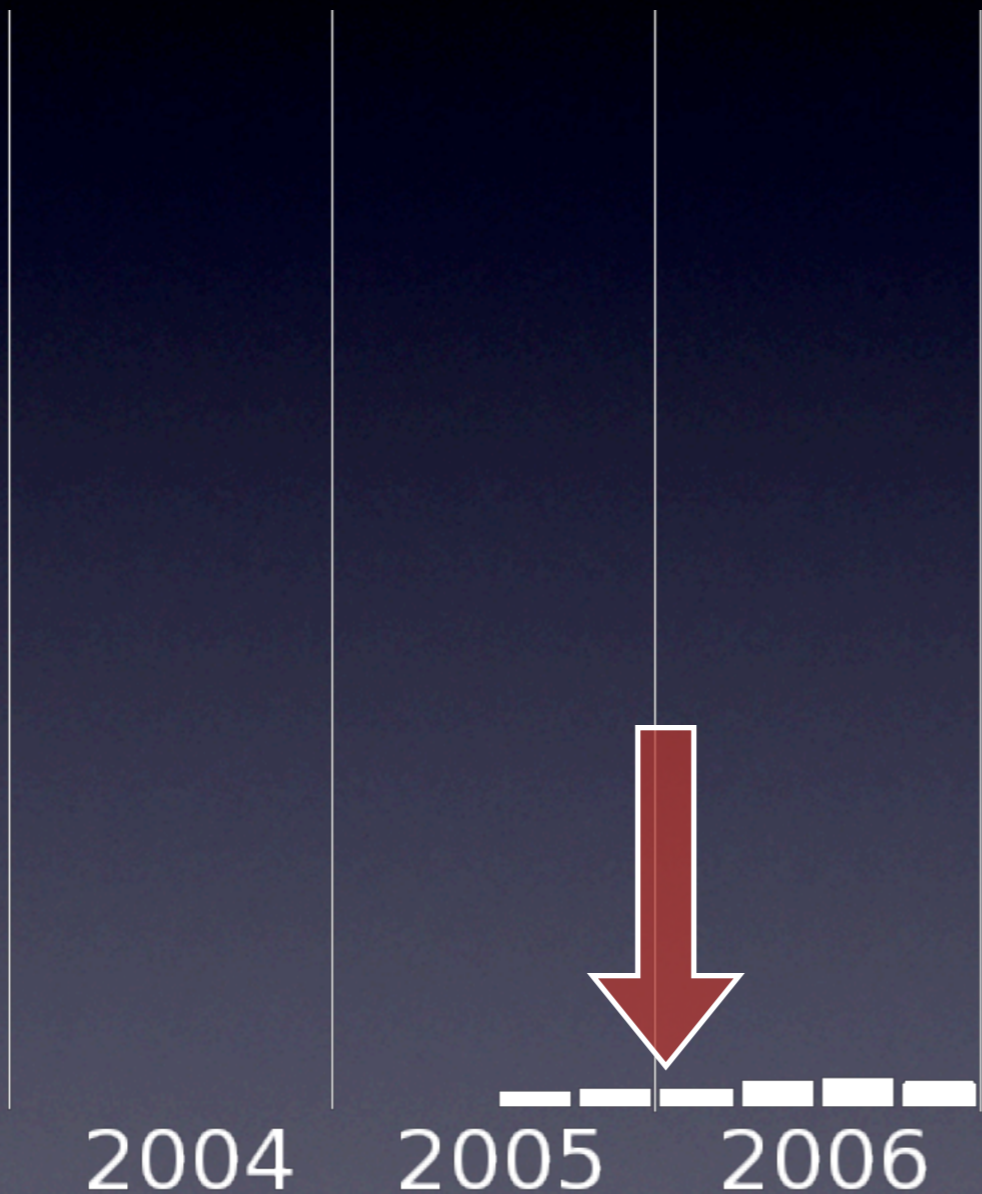

- 2003–2005
- Be pajamų
- Shithole
- Code code code!

# Pirmi pardavimai

- Tik Mac OS X
- Apple WWDC
- Mac gamedev
- ~7000€ / mėn

# Aras prisijungia

Niekas  
nepasikeičia :)

# 2006

- CEO, CTO, aš ir studentas
- Pajamos nedidėja
- Code code code
- Community / Word of mouth
  - Kitokiam marketingui nėra žmonių/\$

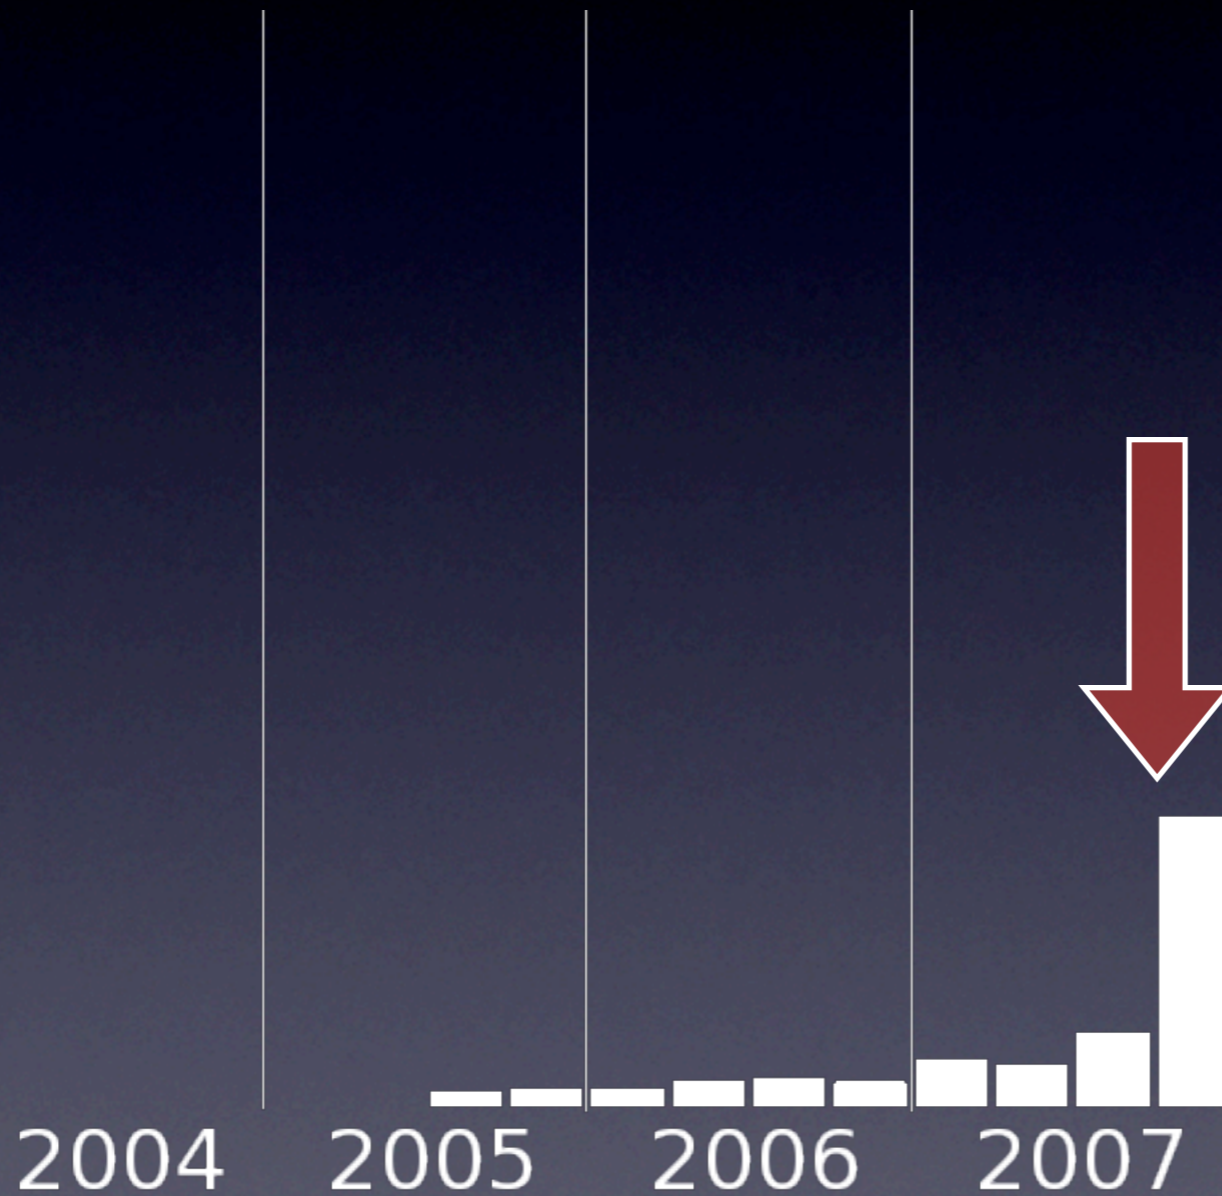

# 2006/2007

- Kiekvienas mėnuo – klausimas
- Keep on pushing
  - 1.2.2, 1.5, 1.5.1, 1.6, 1.6.1, 1.6.2

# 2006

# 2007

Unity 2.0:  
paid  
upgrade

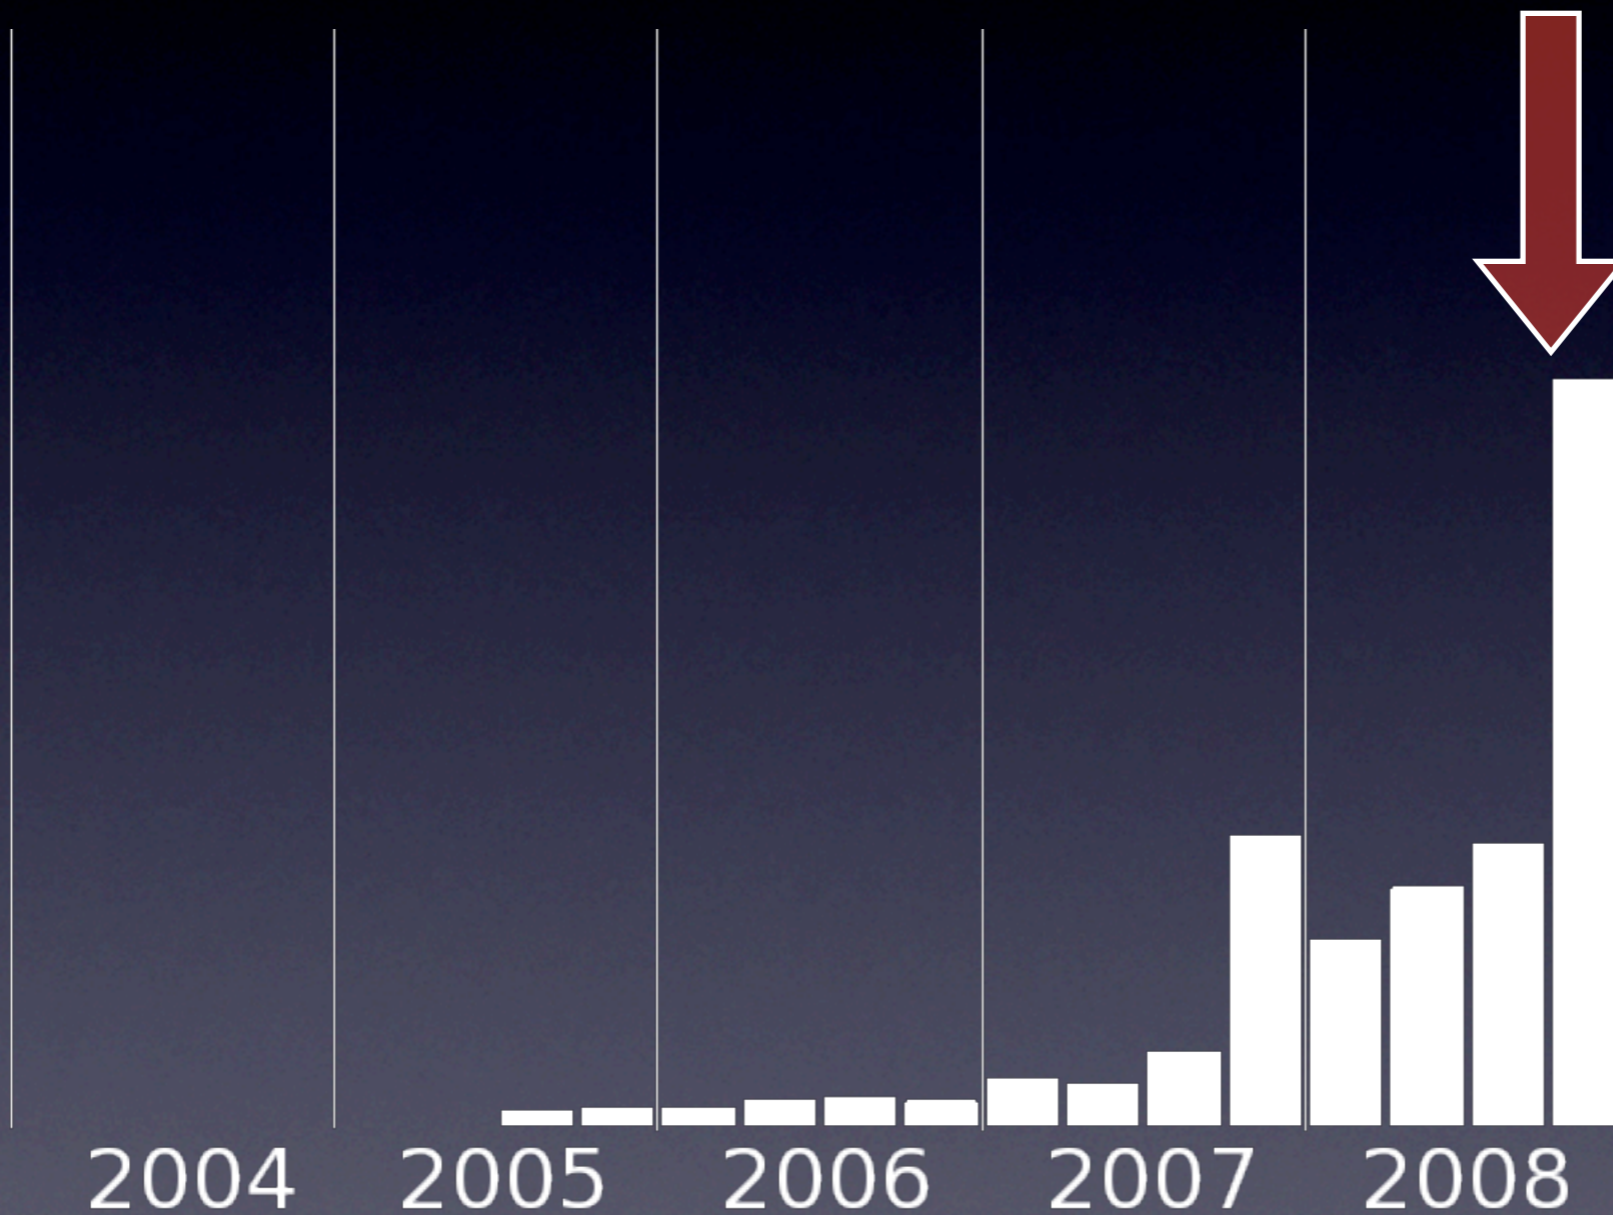

# Unity 2.0

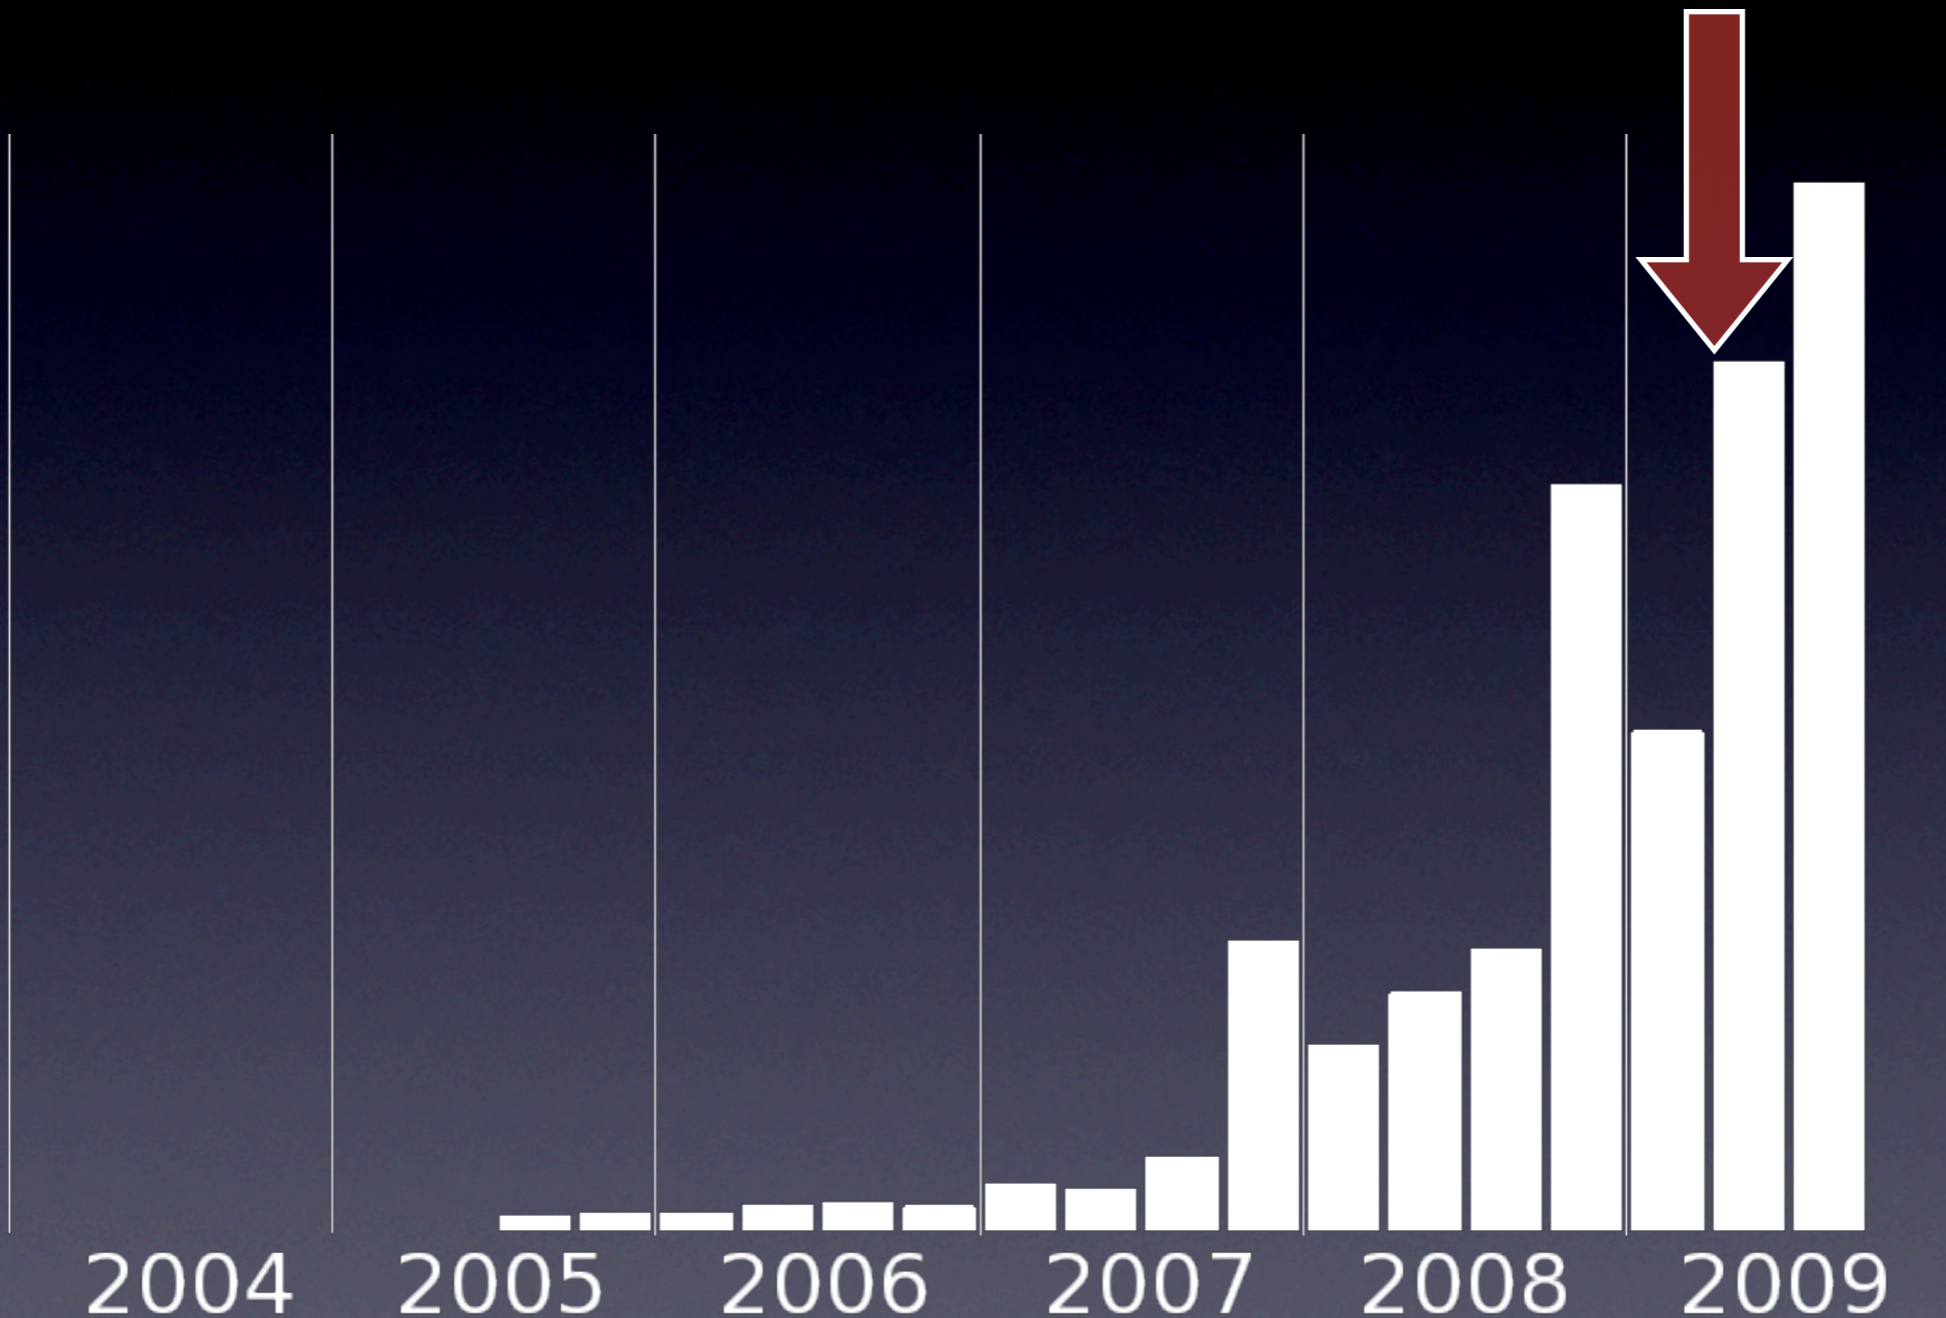

- 2.0 = big deal
- Unity vis dar tik OS X!
  - ...bet žaidimai veikia Windows & OS X
- 11 žmonių
  - Ar vis dar startup?
  - ...vis dar obscure

# Unity iPhone?

# Windows versija

# 2009

- Arti pusēs mln. € / mēn
- 50+ žmonių
  - Kai turi HR, jau nebesi startup'as :)
- Sequoia Capital Series A 5.5 mln. \$

# Going Mainstream

- Startup: kaip pragyventi
- Mainstream: daug daugiau problemų!

# Problemos

- O kas, jeigu...
- Per daug krypčių
- Daug žmonių, sunku adaptuotis
- Ką darys konkurentai?

# Ką pasirinkti?

# Šitiek žmonių!

- Kaip juos visus suvaikyt?

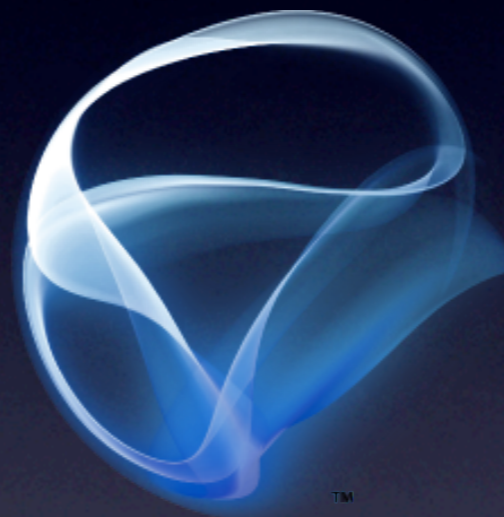

# Distributed

- Kopenhaga
- Vilnius
- Kaunas
- San Franciskas
- Londonas
- Amsterdamas
- Berlynas
- Sietlas
- San Paulas

# Trad. konkurentai

# Baisūs konkurentai

# Idomu

- Are we up to the challenge?

# Moralas

- Startup = fun!
  - (bet ir iššūkis)
- Geri ir protingi žmonės!
- No bullshit!
- Focus!

# Moralas

- Džiaukitės, kol esate startup'ai

# Klausimai?
